

PROJECTS

Web3 developer

Swaap Finance

 2021 - 2024  Remote, Paris

As Swaap Finance's first employee, I wrote the technical solutions helping the company establish a clear market fit within three years, in a very competitive environment.

- Grew the code from a demo to a multisite web3 platform monorepo
- Grew the TVL from 0 to 5M\$ and monthly traded volume to more than 1 billion dollars
- React, Typescript, web3.js, ethers.js, Airtable, TheGraph...

Frontend developer

Diool payments

 2019 - 2021  Remote

Through the Toptal network, I contributed to Diool, a Cameroonian start-up working to become the leading mobile payments provider in the country.

- Upgraded legacy AngularJS to a maintainable Angular application.
- Angular, Typescript, D3.js

Open source lead developer

Masala Parser

 2013 - 2024  Github, Remote

Based on the well-known Parsec library for Haskell, this tool enables users to effortlessly create parsers, from simple regex alternatives to fully featured compilers.

- Earned over 140 GitHub stars
- Supported by 8 contributors, including experts in parsing and compiler design
- Typescript, CI/CD, TDD

Science Teacher

Education Nationale, Internatinal School of Boston

 2000-2007  France, USA

I've worked as a science teacher in both French and U.S. high schools, directed a summer camp, and taught chess, engaging students across varied settings.
