AI PROJECTS

AI Product Manager

Thales

2025-2026 Toulouse

With Labsoft research laboratory - and under NDA - I'm building a system for Thales bringing long term AI innovation in their systems.

- Convinced the client with live creations on Lovable
- AI includes Graph Rag, Langchain
- Product Design of the solution

Open source lead developer

Massivoto

2025 - 2026 Github, Remote

As a solo developer, I'm building a platform for AI and automation, when hallucination is not an option

- 99% code by Cursor and Claude Code, totally maintainable
- AI includes Langchain, MCPs
- Clean code with Typescript, CI/CD, TDD

ReactJS Developer

Nauto AI

2019 Remote

In my freelance role at Nauto, an AI scale-up, I integrated alarm signals into the dashboard, providing an interface for real-time monitoring

- Api design with the AI team
- Smooth frontend with ReactJS, D3.js
- Working in a fast growth californian scaleup

Styled Component

Responsive Design

EDUCATION

Oracle Certified Java Master

Oracle

2011

Computer Science bachelor degree

Université de Marseille

2001

Science teacher concours

République française

2001

English Bilingual

Living 3 years in USA

INDUSTRY PROJECTS

Software Architect

Renault

 2019  Toulouse

On assignment with Celad: I proposed and delivered a cost-effective and innovative CQRS/Event-Sourcing architecture to streamline access to Renault's internal tools.

- Fast execution and notable success, prompting the client to extend the engagement
- Mentored junior developers retained on the project
- Over 500 projects managed, 250,000 authorized accesses
- ReactJS, CQRS, websockets

BCG Consultant

Boston Consulting Group

 2018 - 2019  Remote

Through the Toptal network, I supervised the development of a modern CMS platform for BCG.com facing website, ensuring high standards and functionalities.

- Saved \$25,000+ in consulting fees by switching to an ETL
- Data extraction for the AI team
- Java, Webdriver IO

Java Developer

Airbus

 2010 - 2012  Toulouse

Working with contractors, I worked on Three.js PLM application on the iPad, showing parts of the planes. I also introduced GWT framework for an internal electronic software.

- Innovation with tablets and 3D visualization for 4.0 Industry
- Productivity gain by switching from Struts to GWT
- Unusually good documents produced

COMMUNITY

Toptal

Screened by Toptal 3% selection

7000+ pts - Java & Javascript badges

Toulouse Java User Group

Meetup Organizer

PROJECTS

Web3 developer

Swaap Finance

 2021 - 2024  Remote, Paris

As Swaap Finance's first employee, I wrote the technical solutions helping the company establish a clear market fit within three years, in a very competitive environment.

- Grew the code from a demo to a multisite web3 platform monorepo
- Grew the TVL from 0 to 5M\$ and monthly traded volume to more than 1 billion dollars
- React, Typescript, web3.js, ethers.js, rxjs, TheGraph...

Frontend developer

Diool payments

 2019 - 2021  Remote

Through the Toptal network, I contributed to Diool, a Cameroonian start-up working to become the leading mobile payments provider in the country.

- Upgraded legacy AngularJS to a maintainable Angular application.
- Angular, Typescript, D3.js

Open source lead developer

Masala Parser

 2013 - 2024  Github, Remote

Based on the well-known Parsec library for Haskell, this tool enables users to effortlessly create parsers, from simple regex alternatives to fully featured compilers.

- Earned over 140 GitHub stars
- Supported by 8 contributors, including experts in parsing and compiler design
- Typescript, CI/CD, TDD

Science Teacher

Education Nationale, Internatinal School of Boston

 2000-2007  France, USA

I've worked as a science teacher in both French and U.S. high schools, directed a summer camp, and taught chess, engaging students across varied settings.
